

## Claustrophobia 2

**Question: What happens when you spray air freshener or perfume in a room?**

**Materials:**

**perfume or air freshener**

**science journal**

**pencil**

**timer (optional)**

## Claustrophobia 2

1. Spray a couple of squirts of perfume or air freshener on one side of the room.
2. Have a partner stand on the other side of the room. Have them raise their hand when they smell the perfume or air freshener. You can use the timer to record how long it takes for the perfume or air freshener to reach your partner.
3. Record the results of your experiment.
