

## Directions for Spanish Phrase Cards

1. Print out cards and laminate.
2. Print out control card and laminate.
3. Set out Spanish Phrase Set work. Place heading cards at the top of the workspace. Place the English phrase cards to the right of the workspace (or child's dominant side). Place the Spanish phrase cards directly under the English Cards
4. Pick up an English phrase card and place the card under the correct heading.
5. Find the matching Spanish phrase card and place it directly to the right under the Español heading card
6. Repeat until all cards are matched.
8. As soon as child is successful, leave them to finish the work.
9. Child checks answers with control card.  
(for easier checking, you can record the correct answer on the back of the Español cards for child to flip to check)

(Show child how to mix up cards before putting the work back in its place - this ensures that the next time the work is used, the cards are not already in the correct order)

The following resource is a site where you can look up the phrases for correct enunciation:
